Mr. F. Moran McConihe
Commissioner of Public Buildings
General Services Administration
Washington 25, D. C.

Dear Mr. McConihe:

In connection with this Agency's projected move to our new building to be constructed in Langley, Virginia, we have determined that certain components requiring ready public access should continue to be located in downtown Washington. In addition, since present estimates indicate that the floor space which can be provided from our approved appropriation will fall seriously short of meeting our space requirements, we may have to exclude from the new building certain additional components which can be located elsewhere with minimum inconvenience.

Although we may find it advisable to request additional funds to more nearly meet our space requirements, it is apparent that we will continue to require permanent space in the central metropolitan area. The immediate transfer of certain components to permanent quarters, where they would remain even after the completion of our new building, would greatly assist us in solving the over-crowded conditions which are presently confronting us.

We understand that the Atomic Energy Commission will begin vacating their space in the Matomic Building, 1717 H Street, N.W., in the latter part of 1957. Since we are now occupying two floors of this building, the assignment of the AEC space to this Agency would be highly desirable. Agency components not scheduled for location in the new building could be moved into the Matomic Building as soon as AEC vacates the space.

It is therefore requested that the above-mentioned additional space in the Matomic Building be assigned to the Agency. Any assistance you may be able to provide in this connection will be greatly appreciated.
